DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 9, the phrase "receiving" needs to be replaced with --for receiving-- or --adapted to receive-- to eliminate reference to method of operating the claimed system.

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over IKEDA et al. (5,445,798), for reasons as of record.

3. Claims 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over IKEDA '798 in view of BECKMANN et al. (4,559,467), for reasons as of record.

Allowable Subject Matter

4. Claims 6-8 are allowed.

5. Dependent claim 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

6. The following is an examiner's statement of reasons for allowance: Because independent claim 6 has been amended to emphasize patentable feature of the present feature and to clearly distinguish from the prior art references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

7. Applicant's arguments filed December 1, 2003 to claims 10-13 have been fully considered but they are not persuasive.

In response to Applicant's arguments that "This relationship of components is not shown by Ikeda et al.", the Examiner finds this is to be unpersuasive because the Examiner has asserted and stated in the first Office action the complete relationship of the recited structural features in IKEDA.

To the argument that the feature of mounting the sharp-tipped component within a negatively charged fly ash stream to produce ozone", the Examiner maintains the rejection to claims 10-13 because the above limitation of mounting is an intended use of the system of which it cannot be given any patentable weight as asserted by the Examiner in the first Office action.

To the argument that Applicant's device is structurally distinct from the prior art references in that applicant's device requires no external voltage device to produce high voltage, since the above limitation on which Applicant relies is not stated in the claims, it is irrelevant whether the references includes the feature or not.

Conclusion

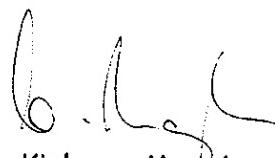

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kishor Mayekar whose telephone number is (571) 272-1339. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam Nguyen can be reached on (571) 272-1342.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-1300.
